Application No.

Continuation of 2. NOTE: Applicant's amendment and remarks have been fully considered, however, the remarks are not persuasive. Walrath et al. discloses that their device can be used in a sprinkler system and by incorporating a removable nozzle as taught by Tyler, the device of Walrath et al. becomes a sprinkler assembly which comprises the sleeve valve as recited in claim 8. Regarding claim 9, the actual flow path comprises the sections indicated by 12, 14, and 26, and thus, sections 36 and 40 are not considered to be obstructions. Regarding claim 34, Hruby, Jr. discloses that the dispensing device or nozzle 34 "can be installed into housing 91 if desired." This language does not preclude one having ordinary skill in the art from installing a rotary driven sprinkler as taught by Cochran since the rotary driven sprinkler of Cochran is driven by water flow into and out of the nozzle and this water flow would be provided by the valve of of Hruby, Jr. The amendments to claim 35 raises new issues that would require further consideration and search.
